

DOORS

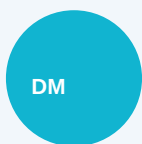

ROLE-BASED ACCESS CONTROL + LAYERED SECURITY

The right access. The right protection.

Give every user exactly what they need - while protecting every session, connection and data exchange.

FIVE ROLES. CLEAR RESPONSIBILITIES.

Separation of duties turns access control into accountable action.

DATA MANAGER

GOVERNS + APPROVES

ADMIN PLANE | doorsadmin.gepnic.nic.in

Controls approvals, SQL templates, user/client mappings, API clients and platform governance.

EXTERNAL USER

REQUESTS + CONSUMES

EXTERNAL PLANE | doorsexternal.gepnic.nic.in

Submits data requests and accesses approved data through reports or authorized APIs.

DEVELOPER

BUILDS + TESTS

ADMIN PLANE | doorsadmin.gepnic.nic.in

Creates parameterized SQL templates, validates them and submits them for approval.

DATA VIEWER

VIEWS + ANALYZES

EXTERNAL PLANE | doorsexternal.gepnic.nic.in

Views authorized data through the interactive reporting experience.

API USER

INTEGRATES + DOWNLOADS

Assigned-client access to governed operations and permitted downloads.

ALLOWED DOMAIN PLANES

EXTERNAL PORTAL | doorsexternal.gepnic.nic.in | API PLANE | doorsapi.gepnic.nic.in

SECURITY AT EVERY LAYER

Defense-in-depth from user access to API consumption.

SECURE SESSION HANDLING

Controlled sessions protect authenticated activity.

UI RATE LIMITING

Controls repeated portal requests and abusive patterns.

ENCRYPTED DATA IN TRANSIT

UI-to-backend communication is protected in transit.

API RATE LIMITING + PKI

Protects automated access and verifies signed exchanges.

CONTROL WHO CAN ACT. PROTECT HOW DATA MOVES. VERIFY WHAT IS DELIVERED.

SEE DOORS SECURITY IN ACTION

Role workflows, governance controls and protected data delivery.
