GePNIC - SASCI Integration Document

DOORS API catalogue, data fields and complete sample JSON

This document covers the three APIs onboarded for GePNIC–SASCI integration: AOC Details, Financial Evaluation Details and Tender Status. Each dataset has its own field table, followed by its complete sample JSON in the annexures at the end.

API summary

API name	Input parameter	Data shared
AOC Details	AOC Summary Date- YYYY-MM-DD	Published tender information, technical and financial opening and evaluation records, award details, bidder outcomes and document references.
Financial Evaluation Details	Summary Date YYYY-MM-DD	Published tender information and financial evaluation results, including bidder identity, evaluated amounts, ranks and committee details.
Tender Status	Summary Date YYYY-MM-DD	Tender identity, current status and stage, classification, work description and stage history with summary timestamps.

Request and response structure

The request includes agentIds, an array of authorized source instances, and params, which contains the date parameter. The source instance in all three samples is GePNIC-Staging-1. The response envelope contains status, message and payload; each payload entry includes GePNIC_Instance_ID, type and value.

Reading the tables

JSON types are the types observed in the supplied data. “null” means that only null was observed; it does not define the field’s non-null type or whether the field is mandatory. Empty strings and empty arrays remain unchanged in the annexures.

Dataset	Sample records	Complete sample
AOC Details	4	Annexure A
Financial Evaluation Details	2	Annexure B
Tender Status	12	Annexure C

AOC Details

API query: SASCI-AOC
Input: AOC Summary Date - (YYYY-MM-DD).

Published tender information, technical and financial opening and evaluation records, award details, bidder outcomes and document references.

Document entries provide metadata and file references. a_DATE_COMPLETION is numeric in this sample; no unit is assigned here because the sample does not specify one.

Financial Evaluation Details

API query: SASCI-FINEVALDETAILS
Input: Summary Date - (YYYY-MM-DD).

Published tender information and financial evaluation results, including bidder identity, evaluated amounts, ranks and committee details.

The Financial Evaluation response contains PUBLISHED_DETAILS and EVALUATION_DETAILS.FINANCIAL_EVALUATION. t_CURRENCY is a Boolean flag in this dataset; the sample value is false.

Field name	JSON type	Data shared
Object path: Response root		
status	string	Overall response status.
message	string	Response message.
payload	array	Array of source-instance response entries.
Object path: payload[]		
GePNIC_Instance_ID	string	Identifier of the GePNIC instance supplying the data.
type	string	Payload format indicator; json in these samples.
value	object	Object containing the business dataset.
Object path: payload[].value		
DATA	array	Array of tender records.
Object path: Tender record		
PUBLISHED_DETAILS	object	Published tender information.
EVALUATION_DETAILS	object	Technical and financial evaluation information.
Object path: Tender record.PUBLISHED_DETAILS		
t_ID	string	Tender identifier.
t_UNIQUE_FILE_NO	string	Unique file number.
t_REF_NO	string	Tender reference number.
t_TITLE	string	Tender title.
t_DESC	string	Tender or work description.
t_PRE_QUAL	string	Prequalification information.
t_LOCATION	string	Work location.
t_PINCODE	integer	Location PIN code.
t_CURRENCY	boolean	Boolean currency-related flag; false in the sample.
t_FEE	integer	Tender fee.
t_VALUE	integer	Tender value.

Field name	JSON type	Data shared
t_EMD	integer	Earnest money deposit amount.
t_PUB_DATE	string	Tender publication timestamp.
t_PREBID_DATE	string / null	Pre-bid meeting timestamp, where supplied.
t_DOC_START_DATE	string	Document availability start timestamp.
t_DOC_END_DATE	string	Document availability end timestamp.
t_BIDSUB_START_DATE	string	Bid submission start timestamp.
t_BIDSUB_END_DATE	string	Bid submission end timestamp.
t_BID_OPEN_DATE	string	Scheduled bid opening timestamp.
t_INVITING_OFFICER	string	Tender inviting officer.
t_INVITING_OFF_ADDRESS	string	Tender inviting authority address.
t_PROD_CAT	string	Product category.
t_PROD_SUB_CAT	null	Product subcategory, where supplied.
t_TENDER_TYPE	string	Tender type.
t_TENDER_CATEGORY	string	Tender category.
t_FORM_CONTRACT	string	Form of contract.
t_REMARKS	string	Tender remarks.

Object path: Tender record.EVALUATION_DETAILS		
FINANCIAL_EVALUATION	object	Financial evaluation summary and bid results.
Object path: Tender record.EVALUATION_DETAILS.FINANCIAL_EVALUATION		
BID_DETAILS	array	Array of bid-level records.
COMMITTEE_TYPE	string	Type of evaluation committee.
CHAIRPERSON_NAME	string	Evaluation committee chairperson.
COMMITTEE_MEMBERS	string	Evaluation committee members.
ACTION	null	Financial evaluation action.
REMARKS	null	Remarks for this bid or evaluation summary.
SUMMARY_DATE	string	Summary timestamp for this opening or evaluation.
Object path: Tender record.EVALUATION_DETAILS.FINANCIAL_EVALUATION.BID_DETAILS[]		
BID_ID	integer	Bid identifier.
BIDDER_NAME	string	Bidder name.
GEBID	string	GePNIC bidder identifier.
BID_PAN	string	Bidder PAN.
BID_GSTN	string / null	Bidder GST registration identifier.
STATUS	string	Bid status within this opening or evaluation section.
EVALUATED_AMOUNT	integer	Evaluated bid amount.
BID_RANK	string	Rank assigned to the evaluated bid.
REMARKS	string	Remarks for this bid or evaluation summary.

Tender Status

API query: SASCI-TenderStatus
Input: Summary Date - (YYYY-MM-DD).

Tender identity, current status and stage, classification, work description and stage history with summary timestamps.

The request Summary Date and the returned event timestamp summaryDate are distinct. Stage history can include earlier dates and repeated stages. currentStatus and currentStage are separate response fields.

Field name	JSON type	Data shared
Object path: Response root		
status	string	Overall response status.
message	string	Response message.
payload	array	Array of source-instance response entries.
Object path: payload[]		
GePNIC_Instance_ID	string	Identifier of the GePNIC instance supplying the data.
type	string	Payload format indicator; json in these samples.
value	object	Object containing the business dataset.
Object path: payload[].value		
TENDER_DETAILS	array	Array of tender status records.
Object path: Status record		
tenderId	string	Tender identifier.
tenderTitle	string	Tender title.
currentStatus	string	Current tender status.
currentStage	string	Current tender processing stage.
tenderCategory	string	Tender category.
tenderType	string	Tender type.
workDescription	string	Description of the work, goods or services.
TENDER_STAGE_DETAILS	array	Array of stage events for the tender.
Object path: Status record.TENDER_STAGE_DETAILS[]		
tenderStage	string	Stage or event name.
summaryDate	string	Timestamp of the stage event.
