

DOORS

Data Orchestration and On-demand Reporting System

FAQ, Glossary and Support Guide

DOORS Reference

Document ID	Version	Audience	Classification
DOORS-FAQ-GLOSSARY-SUPPORT	1.0	All authenticated users	NIC INTERNAL

Document control

Field	Value
Title	FAQ, Glossary and Support Guide
Owner	DOORS Product Governance
Version / status	1.0 / Approved for initial publication
Effective date	30 August 2026
Review cycle	At every material release or annually
Audience	All authenticated users
Authoritative source	Current DOORS release, configuration and governance records

Publication rule

Use the authenticated DOORS Documentation Hub as the source of truth. Downloaded copies may become obsolete after a release, security change or policy revision.

Frequently asked questions

Area / symptom	Control / response
Why can I not see a menu/report?	Your role or mapping does not authorize it. Ask the Data Manager; do not share accounts.
Why was my request rejected?	Review the recorded reason and submit a minimized, justified requirement.
What is a correlation ID?	A non-secret identifier linking a request across logs and services.
Can I retry a failure?	Only when the operation is safe and retry limits permit; preserve the first correlation ID.
Can I email an export or SDK?	Only through approved channels and never with secrets/private keys.
Why does AES fail with BadPadding?	Usually the registered public certificate does not match the SDK private key.
Why does Java report PKIX failure?	The server/CA certificate is not trusted or hostname validation fails; do not disable TLS.
Where are download logs?	Document Hub -> Download Logs, subject to Data Manager access.

Glossary

Area / symptom	Control / response
Agent	DOORS component executing approved operations near a source database.
API Client	Registered machine consumer identified by API key and ClientName.
Eligibility	Policy decision permitting a specific document retrieval.
Manifest	Governed list of documents and opaque download operations.
Opaque reference	Signed/non-inventable identifier resolved only by DOORS.
RBAC	Role-based access control.
SDK	Generated client kit implementing the governed integration flow.
SoD	Segregation of duties between incompatible responsibilities.

Support checklist

- Provide role/client name, operation, timestamp, environment and correlation ID.
- Include sanitized status/error and expected versus actual behavior.
- Never attach credentials, private keys, full sensitive data or unredacted logs.

Review and assurance checklist

The document owner and reviewer must complete this page before approving a revision for publication.

- Technical statements match the currently deployed release and approved configuration.
- Role scope and segregation-of-duties boundaries are accurate.
- Examples contain no credentials, private keys, sensitive records or exploitable internal details.
- Endpoints, error meanings, limits and operational actions have been tested where applicable.
- Related test cases, runbooks and release notes have been updated.
- The authenticated Documentation Hub contains the approved version and supersedes downloaded copies.

Approval record

Record the document version, reviewer, approval reference and effective date in the governed release record. Do not add handwritten approval data to uncontrolled downloaded copies.
